

What happens when  
your loved one's memory  
starts to fade?

①

Forgetting to take medication,  
neglecting physical activity, and  
allowing one's mental health to slip are  
all potential issues.

②

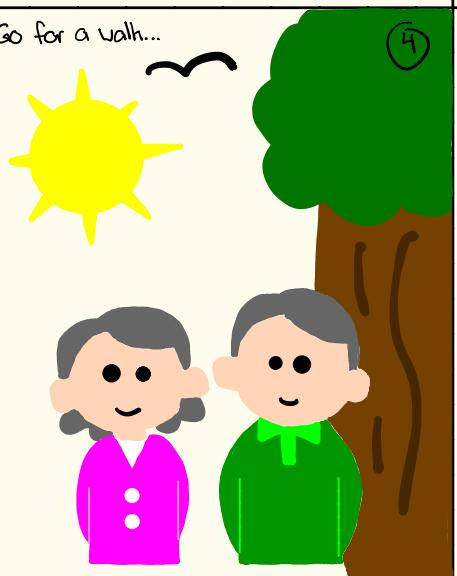

What if there was an  
application to aid the  
elderly in remembering  
their every-day  
tasks?

③

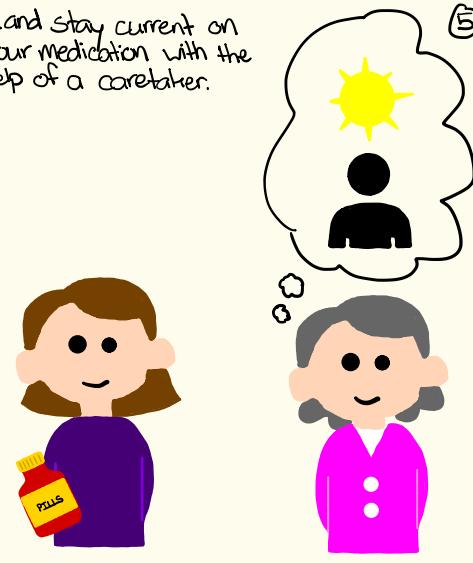

Go for a walk...

④

...and stay current on  
your medication with the  
help of a caretaker.

⑤

When the day is over, check  
up on what tomorrow has  
in store!

⑥
